

1/8" BLEED AREA

AMDRO

QUICK KILL

INDOOR/OUTDOOR*

CARPENTER BEE

ANT & TERMITE KILLER

FOAM

EASY TO APPLY | INCLUDES STRAW
IN CRACKS AND CREVICES FOR TARGETED APPLICATION

KILLS	Carpenter Bees, Carpenter Ants, Termites* (including subterranean, drywood, dampwood and arboreal) and other listed wood-damaging insects.
WHERE TO USE	For use in and around structures and limited outdoor* spot treatments where wood-damaging insects are seen or suspected. *Not for Outdoor/Exterior Use in California
HOW TO USE	Insert applicator straw into nozzle and spray to apply where insects to be treated are seen or suspected

KILLS: Wood Destroying Insects (Powder Post Beetles, Old House Borer, Wharf Borer) and Ants (Including: Argentine, Ghost, White-Footed; Excluding: Fire, Harvester, Leaf cutter and Pharaoh).

For use in and around structures and limited outdoor* spot treatments: Apartments, Homes, Hobby Greenhouses, Interiorscapes.

*Not a substitute for mechanical alteration, soil or foundation treatment.

FIRST AID

If swallowed:	• Call a poison control center or doctor immediately for treatment advice. • Have a person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
If inhaled:	• Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for treatment advice.
If in eyes:	• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If on skin or clothing:	• Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378, 6:30 AM to 4:30 PM Pacific Time (PT), seven days a week. During other times, call the poison control center at 1-800-222-1222.	

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION. Harmful if swallowed. Avoid contact with skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

ENVIRONMENTAL HAZARDS

Do not apply within 15 ft of bodies of fresh water: lakes, reservoirs, rivers, permanent streams, marshes, natural ponds and commercial fishponds. A 15 ft buffer of uniform groundcover must exist between the application area and bodies of fresh water (uniform ground cover is defined as land which supports vegetation of >2" throughout).

Do not apply within 60 ft of estuarine bodies of water. Estuarine water bodies are brackish, tidal water such as bays, mouths of rivers, salt marshes and lagoons.

This product is toxic to birds, fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Care must be taken to avoid runoff. Do not contaminate water by disposal of wastes.

PHYSICAL/CHEMICAL HAZARDS

CONTENTS UNDER PRESSURE. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Avoid drilling areas near electrical wiring, plumbing, communication lines, etc. Do not apply product directly into any electronic equipment (i.e., radios, televisions, computers, etc.), or where an electrical short circuit might result, such as in wall outlets, conduits, motors, switches, etc. Product should only be used when temperature is above 60°F. If temperature is below 60°F, store at room temperature until temperature above 60°F is reached.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label. Use strictly in accordance with label precautionary statements and directions.

IMPORTANT: Read entire DIRECTIONS FOR USE before using this product. Shake well before using.

Use Restrictions:

Do Not use this product for termite control indoors, except for label-specified applications for termite control.
Do Not use on animal trophies or animal skins.
Do Not contaminate food, feedstuffs, or water supply.
Do Not contaminate food preparation surfaces, kitchen utensils, dishes, or food storage containers.

This product is a ready-to-use termiticide/insecticide formulation. When this product is sprayed, the product rapidly expands generating a dry foam with an expansion ratio of approximately 30:1, with 1 oz (28 g) of product being dispensed in approximately 5 sec producing approximately 1 qt (946 mL) of foam. This product can be used to control insects where they are found or suspected; including: in nests, galleries, harborage and voids. This product can be applied in and around residential structures as well as structural and non-structural elements that can potentially be attacked by, or provide harborage to, insects. Applications of this product can be made from the interior and/or exterior. Drilling of hole(s) may be necessary to access galleries or harborages. Treatment of insect harborages associated with fences, bridges, landscape timbers, under slabs or other non-structural elements is permitted with this product.

*Not for Outdoor/Exterior Use in California.

TREATMENT OF INSECT GALLERIES, HARBORAGES OR VOIDS:

Use sufficient foam to treat the known or suspected insect harborages. After applying this product, hold the injector tip in place for approximately 8 sec to allow the product within the injector tube to dispense into the treatment area. Drilling hole(s) may be required to access the known or suspected gallery, harborage or void. Drill hole(s) at 1 or more locations along the gallery, harborage or void for proper treatment. Use of a moisture meter may help to determine the spread of a treatment. This product can be used as a localized treatment for the control of existing infestations of subterranean termites and other wood destroying insects, or as a supplemental treatment in a structural protection program. This product is intended for use on localized wood destroying insect infestations only. The purpose of localized applications is to kill wood destroying insects which may be present in the treated channels at the time of treatment. Localized applications are intended as supplemental treatments and not a substitute for: mechanical alteration, soil treatment, or foundation treatment. This product should not be used as a stand-alone treatment for structural protection.

Reapplication Interval for this product: This product may be applied to previously treated sites if activity is found 30 days after previous application.

WOOD DESTROYING PEST TREATMENTS - INDOORS

TERMITES: Use this product in areas where termites are known or suspected. Apply this product to termite galleries, channels, damaged wood, harborages between structural elements or within construction voids. Indoor termiticide treatment locations may include areas associated with unexposed wooden elements inside wall voids, in and around bath traps, shower voids, pipe chases, utility penetrations and other probable sites of termite entry or harborage.

OTHER WOOD DESTROYING PESTS (POWDER POST BEETLES, OLD HOUSE BORER AND WHARF BORER): Treatment locations may include areas associated with exposed non-sealed wooden elements in areas such as crawl spaces, attics, unexposed wooden elements inside walls, galleries or other harborages.

WOOD DESTROYING PEST TREATMENTS - OUTDOORS*

*Not for Outdoor/Exterior Use in California

Outdoor treatment locations may include exterior wooden elements associated with bridges, decks, fencing, landscape timbers, wooden retaining walls, siding, channels in damaged wood, spaces between wooden elements of a structure, junctions between wood and foundations and voids associated with buildings. This product can be used to treat piers of homes, patios, decks, or other structures if they are not directly above water. This product can be used to treat areas associated with bridges not directly above water. Do not apply this product in or on boats. Do not apply to piers, bridges, or any other structures that may contact surface water bodies. Do not allow this product to come into contact with or contaminate surface waters through application or drift. Applications to exposed subterranean termite tunnels (i.e. shelter tubes) may be made to residential outdoor areas. Break open a section of the shelter tube and apply directly over the exposed area. Apply enough product to cover the exposed area and a distance of approximately 2" in each direction over the shelter tube itself. Do not apply this product during precipitation. Do not apply to soil that is water saturated or frozen or in any conditions where run-off or movement from the treatment area is likely to occur.

Outdoor applications of this product must be limited to small spot treatments only. Do not apply this product to any impervious surfaces. Do not make direct applications, nor any applications of this product to the ground within the drip line of any trees or shrubs used for growing fruits, nuts, vegetables or other foods.

TERMITES, CARPENTER ANTS, OR CARPENTER BEES HARBORING IN STUMPS, SLABS AND FENCES: Drill 1 or more holes into areas of suspected termite, carpenter ant, or carpenter bee activity. It may be necessary to drill several holes around the circumference of the stump at varying heights, to properly treat the nest or gallery system. When treating below slabs, drill 1 or more holes through the slabs where termites, carpenter ants, or carpenter bees are active, or suspected, and inject this product. For fences, treat exposed surfaces with this product where termites, carpenter ants, or carpenter bees are active (Please note: the foam must dissipate or excess foam must be removed before the applicator leaves the area) and/or drill wooden members where termites, carpenter ants, or carpenter bees are active, or suspected, and inject this product.

*Not for Outdoor/Exterior Use in California.

CARPENTER BEES OR FORAGING CARPENTER ANTS: This product is intended for outdoor treatments for carpenter bee or carpenter ant harborages or trails associated with decks, fences or other non-structural elements. Inject this product into galleries, cavities, harborages or structural voids. Apply the foam up to a 6" length of the carpenter bee or carpenter ant trail. Please note: the foam must dissipate or excess foam must be removed before the applicator (or user) leaves the area.

*Not for Outdoor/Exterior Use in California.

EXTERIOR PERIMETER/LOCALIZED INTERIOR

TERMITES: This product can be used as a preventative or curative interior structural void treatment for subterranean termites when applied in conjunction with an Exterior Perimeter/Localized Interior (EP / LI) termiticide labeled for EP / LI application. Targeted interior application(s) of this product may be made to vulnerable areas such as voids associated with plumbing/utility lines penetrating floors, bath and/or shower voids, expansion joints and/or settlement cracks, wall voids and other voids of probable, potential, or known termite entry.

When this product is used to treat known or suspected localized interior termite infestation(s), this product can be used in lieu of other localized interior treatment(s). Targeted interior application(s) of this product may be made to vulnerable areas such as voids associated with plumbing/utility lines penetrating floors, bath and/or shower voids, expansion joints and/or settlement cracks, wall voids and other voids of probable or potential termite entry.

This application is intended for localized areas of existing or potential termite activity and must not be applied to indoor surfaces for the purposes of general pest control. This product is not a substitute for soil-applied termiticide treatment(s) beneath slabs or foundations.

NON-WOOD DESTROYING PEST TREATMENTS CRAWLING PESTS - Ants (Excluding Fire, Harvester, Leaf Cutter and Pharaoh): Treat voids with this product, where these pests enter, hide or harbor. Immediately wipe up any excess product on exposed surfaces.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal. **PESTICIDE STORAGE:** Store in original container. Keep away from open flame, sparks, heated surfaces, and avoid excessive heat (>130°F). Store in a cool, dry place inaccessible to children and pets.

CONTAINER DISPOSAL: DO NOT puncture or incinerate! Empty container by using the product according to the label directions. **Non-refillable container. If empty:** Offer container for recycling, if available, or place in trash if allowed by state and local regulations. **If partly filled:** Call your local solid waste agency for disposal instructions.

WARRANTY

Read the entire Directions for Use and Warranty before using this product. By using this product, user or buyer accepts the following warranty. The directions for use of this product are believed to be adequate and must be followed carefully. It is impossible to eliminate all risks associated with the use of this product. Unintended consequences may result because of unknown factors. All such risks shall be assumed by the user or buyer. The seller is committed to providing high quality products. To the extent consistent with applicable law, the seller makes no warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond statements on this label. To the extent consistent with applicable law, the manufacturer or the seller shall not be liable for indirect, special, incidental or consequential damages. To the extent consistent with applicable law, the exclusive remedy of the user or buyer shall not exceed the purchase price paid.
