Shake Well Before Use

**EcoVia™ WH**  
stinging insect killer

**DIRECTIONS FOR USE**

Always read label directions and precautions prior to use.

Shake well before using and periodically during use.

This product can be used outdoors, and in unfinished indoor areas such as attics, basements, garages and sheds.

**PRECAUTIONS AND NOTICES:**

- Keep out of reach of children. Avoid contact with eyes and skin and avoid directly breathing spray. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If more than an incidental amount is swallowed, seek medical attention. Some individuals may be sensitive to plant oils. If irritation persists, or if more than an incidental amount is swallowed, seek medical attention. If seeking medical treatment, have this label with you.
- Do not apply on plants. Plants contacted with the spray should be hosed off to prevent possible leaf burn.
- Keep out of lakes, streams and ponds.
- We have tested the product on a variety of surfaces without problems, but it is possible that the plant oils could stain or damage some vinyl siding and plastic surfaces, or painted surfaces, so test spray a small area first before using. Hose off area to remove any residue.

Rockwell Labs Ltd represents that this product is a minimum-risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.

**Wasp and Hornet Treatment:** The best time to apply is at dusk, just before dawn or at night when these insects are less active and in the nest. Paper wasp nests can be sprayed during the day. Stand a safe distance from the nest. Spray with the wind at your back. Hold can in an upright position and aim spray nozzle at the nest or nest entrance. Press button firmly to spray and coat the nest opening for at least 10 seconds. Contact as many wasps / hornets as possible. Repeat as necessary.

**Yellow Jacket Treatment:** The best time to apply is at dusk, just before dawn or at night when these insects are less active and in the nest. Stand a safe distance from the nest. Spray with the wind at your back. Hold can in an upright position and aim spray nozzle toward the nest opening. Apply directly into the opening for at least 8 seconds to kill the yellow jackets in the nest. This will also repel any yellow jackets returning to the nest. Next, contact as many yellow jackets as possible outside the nest. Be aware that yellow jackets nests may have multiple entrances. Repeat as necessary.
