KEEP OUT OF REACH OF CHILDREN

CAUTION: See bottom panel and insert for additional first aid and precautionary statements.

Active Ingredient:
Permethrin 7.4%
Other Ingredients 92.6%
Total 100.00%

Net Contents:
6 Tick Control Tubes at
0.16 oz (4.5 grams) each
Total 0.96 oz (27 grams)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. See leaflet inside box for usage directions.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage. **Pesticide Storage:** Store at room temperature in an area inaccessible to children and pets. **Pesticide Disposal and Container Handling:** Non-refillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions.

PRECAUTIONARY STATEMENTS

FIRST AID

If Swallowed
Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If On Skin or Clothing
Take off contaminated clothing. Immediately rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If In Eyes
Hold eye open and rinse slowly and gently with water for 15-20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may call 1-800-222-1222 for emergency medical treatment information.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS
Combustible. Do not use or store near excess heat or open flame.

GUARANTEE

At Thermacell, we stand behind our products and our quality. If you are not completely satisfied with your Thermacell purchase, you may return it to us for replacement or refund.

Please call customer care at 866-753-3837. To qualify, you must have a receipt and be within a year from the original purchase date.

THERMACELL®

TICK CONTROL TUBES

Active Ingredient:
Permethrin7.4%
Other Ingredients:92.6%
Total100.00%

KEEP OUT OF REACH OF CHILDREN
CAUTION: See side panel for additional first aid and precautionary statements

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

HOW TICK CONTROL TUBES WORK

1. Ticks feed on mice.
2. Tick Control Tubes contain cotton treated with permethrin insecticide.
3. Mice collect the treated cotton and use it to line their nests.
4. Ticks feeding on the mice die.

WHERE TO APPLY

FOR OUTDOOR APPLICATION ONLY. Reduces ticks that feed on mice that may serve as reservoirs for organisms causing Lyme disease and babesiosis. Ticks feeding on these animals become infected and may transmit disease to humans, dogs, and horses. Tubes deposit a tick-killing substance on mice that breaks this cycle.

For best results, place tubes flat on the ground in all brush-covered and wooded areas to be treated. Do not exceed the maximum distance of 10 yards between tubes in any direction. Limit treatment areas to those areas inhabited by mice and need not include mowed lawns or open grasslands. Position tubes so that mice have access to the open ends. Product works best if not covered by leaves or other material.

FOR TREATMENT AROUND YARDS: Place tubes within 1 yard of the edge of mowed lawn. Place tubes around the perimeter for the lawn in places with good coverage for mice such as in flower gardens, under bushes, along fences and stonewalls, and in wood piles and sheds wherever mice may reside. For complete coverage, apply tubes to all brush-covered or wooded areas within 50 yards surrounding the yard area to be protected.

FOR TREATMENT OF WOODED PROPERTIES: Place tubes in a grid pattern with no more than 10 yards between tubes in any direction. For complete coverage, apply tubes up to the brush-covered edge surrounding wooded areas. Tubes placed near thickets or rotting logs within the woodlot will be more effective than those placed in more open woodland terrain.

WHEN TO APPLY

Tubes may be applied anytime between April 1 and mid-September but should be applied at least twice a year. For best results apply tubes in April and July just prior to the feeding activity periods for nymphal ticks (May and June) and larval ticks (August and September). Tubes may also be replaced when nesting material is completely removed. The tubes and unused cotton are biodegradable and may be left in the application site.

HOW MANY TO APPLY

Property Size	Treated Area*	Tubes Per Application	Tubes Per Year
1/4 Acre	Up to 5,500 Sqft	6	12
1/2 Acre	Up to 11,000 Sqft	12	24
1 Acre	Up to 22,000 Sqft	24	48

*There is no need to treat the entire property, only those places inhabited by mice. Don't treat mowed lawns or driveways
