---	--	--

- Lluvia — La lluvia o el riego después de 15 minutos de la aplicación no reducirá la eficacia.
- Rocíe durante la temporada de crecimiento cuando las malezas están en crecimiento activo.
- Para obtener mejores resultados, corte el césped de dos a tres días antes de tratar las malezas.
- Para evitar el riesgo de causar daño al césped, no rocíe en céspedes bajo estrés hídrico.
- El riego inmediatamente después del tratamiento puede reducir la eficacia.
- Espere hasta que el pasto recién sembrado esté bien establecido o después del tercer corte antes de aplicar este producto.
- Las zonas tratadas se pueden volver a sembrar de tres a cuatro semanas después de la aplicación.
- Si algunas malezas resistentes no mueren en el plazo de tres semanas, repita el tratamiento a las zonas afectadas.
- La aplicación a los céspedes zoysia cuando están emergiendo de la inactividad en la primavera puede causar daño.
- La aplicación excesiva, particularmente en temperaturas por encima de 90°F puede causar daño.
- La aplicación al césped Bermuda puede causar amarillamiento temporal, pero se puede esperar una recuperación total.

ALMACENAMIENTO Y ELIMINACIÓN

Almacenamiento del pesticida: Guarde en un lugar fresco y seco, lejos del calor y del fuego.

Eliminación del pesticida y manipulación del envase: Si está vacío: Envase no rellenable. No vuelva a usar ni a rellenar este envase. Tírelo en la basura u ofrezcalo para reciclar, si existe esa opción.

Si está parcialmente vacío: Llame a su servicio de eliminación de desechos más cercano para obtener instrucciones de eliminación. Nunca tire el producto sin usar por ningún drenaje interno ni externo.

DECLARACIONES PREVENTIVAS

Riesgos para los seres humanos y los animales domésticos

PRECAUCIÓN: Causa irritación moderada a los ojos. Evite el contacto con los ojos o la ropa. Nocho si se ingiere. Use camisa de manga larga, pantalones largos, calcetines, zapatos y guantes. Lávese muy bien con agua y jabón después de manipularlo y antes de comer, beber, masticar chicle, usar tabaco o usar el baño.

Primeros auxilios

Si se ingiere: Llame inmediatamente a un centro de control de envenenamientos o a un médico para recibir instrucciones de tratamiento. Si la persona puede tragar, haga que beba poco a poco un vaso de agua. No induzca el vómito a menos que así se lo indique un centro de control de envenenamientos o un médico. No administre nada por la boca a una persona que haya perdido el conocimiento.

Si entra en contacto con los ojos: Mantenga los ojos abiertos y enjuague con agua lentamente, con cuidado, durante 15 a 20 minutos. Si hay lentes de contacto, retírelos después de los primeros 5 minutos, luego continúe enjuagando los ojos. Llame a un centro de control de envenenamientos para recibir instrucciones de tratamiento.

Cuando llame a un centro de control de envenenamientos o a un médico, o intente obtener tratamiento, tenga a la mano el envase o la etiqueta del producto. También puede llamar al 1-800-917-5438 para recibir instrucciones de tratamiento médico de urgencia.

Riesgos para el medio ambiente

Este pesticida es tóxico para los peces y los invertebrados acuáticos. El arrastre y el escurrimiento pueden resultar peligrosos para los organismos acuáticos de las aguas cercanas al sitio de aplicación. Para proteger el medio ambiente, no permita que el pesticida entre o se escurra por drenajes pluviales, zanjas de drenaje, cunetas ni aguas superficiales. Aplicar este producto cuando no haya viento y no se anticipa lluvia en las siguientes 24 horas ayudará a asegurar que ni el viento ni la lluvia arrastren o quiten el pesticida de la zona de tratamiento.

Este producto químico tiene propiedades y características relacionadas con sustancias químicas detectadas en aguas subterráneas. El uso de este producto químico en zonas de suelos permeables, particularmente donde la capa freática es poco profunda, puede ocasionar la contaminación del agua subterránea. La aplicación alrededor de un tanque de agua o un pozo puede contaminar el agua potable o subterránea.

Tufted evening primrose (Fragrant evening primrose)	Wandering calceolae Water pennywort (Floating marshpennywort)	Whitehop	Wild rose (Prickly wild rose)	Wreath goldenrod (Woodland goldenrod)	Yellow spine thistle
Tufted knobweed	Wormleaf thistle	Wild blackberry (Thornless blackberry)	Wild rose (Prickly wild rose)	Wreath goldenrod (Woodland goldenrod)	Yellow spine thistle
Tumble mustard (Gray thistle)	Wormleaf thistle (Gray thistle)	Wild buckwheat	Wild strawberry	Wreath goldenrod (Woodland goldenrod)	Yellow spine thistle
Tumble pigweed	Western denaris	Wild carrot	Wild violet	Wreath goldenrod (Woodland goldenrod)	Yellow spine thistle

STOP. READ ENTIRE LABEL BEFORE USING.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Precautions and Restrictions

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until sprays have dried.

Do not allow spray to drift onto desirable plants since injury may result. Do not apply as a fine mist because of potential for injury to desirable plants. Do not apply when windy. Do not treat when air temperatures exceed 90°F as damage to grass may occur. Do not use on lawns containing bentgrass, St. Augustinegrass, bahiagrass, centipede grass or carpet grass. Do not use on dichondra, lawns with desirable clovers or legumes, vegetables, fruits or ornamentals. Do not apply more than two applications per year. You must wait at least two weeks between applications.

Do not apply directly to or near water, storm drains, gutters, sewers or drainage ditches. Do not apply within 25 ft of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays and oceans. To prevent product runoff, do not overwater the treated area(s) to the point of runoff or apply when raining or when rain is expected that day. Rinse applicator over lawn area only.

Note: Application to Bermudagrass may cause temporary yellowing or discoloration, but full recovery can be expected. Do not apply to Bermudagrass when daytime temperatures exceed 90°F. Do not apply to zoysiagrass just emerging from dormancy, as it may result in lawn damage.

WHERE TO USE

This product is intended for use by homeowners on residential lawns. This product should be applied only to the following species of turfgrass:

Cool season turfgrass: Kentucky bluegrass; perennial ryegrass; fescue spp., including tall, red and fine leaf fescues

Warm season turfgrass: zoysiagrass**, Bermudagrass***, buffalograss

**Do not apply to zoysiagrass just emerging from dormancy.

***Application to Bermudagrass may cause temporary yellowing or discoloration, but full recovery can be expected. Do not apply to Bermudagrass when daytime temperatures exceed 90°F.

WHEN TO USE*

Apply when daytime temperatures are between 45°F and 90°F.

SPRING: Spray when broadleaf weeds are young and actively growing with adequate soil moisture for best results.

FALL: Spray when broadleaf weeds are young and actively growing with adequate soil moisture for best results. Fall applications will control weeds that may otherwise go dormant through the winter and resprout the following spring. For heavy grass weed pressure, apply a second application at the same rate, 14 days after the first application.

CRABGRASS (LARGE AND SMOOTH): Spring and early summer: For the best results, apply this product from crabgrass emergence until the six-leaf stage (two tillers) or before the crabgrass is 3 to 4 inches tall. This period begins the first time that you can see crabgrass in your lawn. Use two applications with a 14-day interval between applications for dense populations.

FOXTAIL (GREEN, GIANT AND YELLOW): Spring and early summer: For the best results, apply this product to foxtail during the early growth stages or when foxtail is 1 to 4 inches tall. Use two applications at the same rate with a 14-day interval for dense populations.

YELLOW NUTSEDGE: Early summer: Two applications of this product are required when the yellow nutsedge plants are 3 to 6 inches tall. Apply the second application at the same rate at 14 days later.

BROADLEAF WEEDS: Spring: Apply when dandelion, plantain, buttercup, speedwell, knotweed and other broadleaf weeds are young and actively growing with adequate soil moisture for best results. Fall: Apply when henbit, chickweed, white clover, ground ivy, lawn burweed and other broadleaf weeds are young and actively growing with adequate soil moisture for best results. Fall applications will control weeds that may otherwise go dormant through the winter and resprout the following spring.

*Visual symptoms and time to complete kill will depend on weed type, temperature and application rate.

HOW TO USE

1. Turn nozzle to coarse spray pattern. Avoid sprays that are too fine because they can drift and damage other plants.
2. Spray unwanted weeds until completely covered.

USE TIPS

- Some hard-to-kill weeds may require re-treatment. Wait at least 30 days between applications — some weeds can take that long to die.
- Rainproof — rain or watering 15 minutes after application will not wash away effectiveness.
- Spray during growing season when weeds are actively growing.
- For best results, mow lawn two to three days before treating weeds.
- To avoid risk of lawn injury, do not spray drought-stressed lawns.
- Watering immediately after treatment may wash away effectiveness.
- Wait until newly seeded grass is well-established or after the third mowing before applying this product.
- Treated areas may be reseeded three to four weeks after application.
- If certain tough weeds are not dead within three weeks, repeat application to affected areas.
- Application to zoysia lawns when they are emerging from dormancy in the spring may cause damage.
- Overapplication, especially at 90°F or higher, may cause damage.
- Application to Bermudagrass may cause temporary yellowing, but full recovery can be expected.

STORAGE AND DISPOSAL

Pesticide Storage: Store in a cool, dry area away from heat or open flame.

Pesticide Disposal and Container Handling: If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling, if available. If partly filled: Call your local solid waste agency or for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Harmful if swallowed. Wear long-sleeved shirt and long pants, shoes plus socks and gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

First Aid

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person.

If in eyes: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center for treatment advice.

Have the product container or label with you when calling a Poison Control Center or doctor, or going for treatment. You may also contact 1-800-917-5438 for emergency medical treatment advice.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

ALTO. LEA TODA LA ETIQUETA ANTES DE USAR.

MODO DE EMPLEO

Se considera una violación a la ley federal usar este producto de una manera que no sea la indicada en la etiqueta.

Precauciones y restricciones

No aplique este producto de modo que entre en contacto con cualquier persona o mascota, ya sea directamente o por arrastre. Mantenga a las personas y las mascotas fuera de la zona durante la aplicación. No permita que las personas ni las mascotas entren en la zona tratada hasta que los rocíos se hayan secado. No permita el arrastre del rocío sobre plantas deseadas ya que puede provocarles daños. No aplique como niebla fina por la posibilidad de causar daños a las plantas deseadas. No lo aplique cuando haya viento. No trate cuando la temperatura del aire sea superior a 90°F porque se puede dañar el césped. No use en céspedes que contengan agrostis, pasto San Agustín, bahiagrass, ciempés o césped alfombra. No use en dichonda, en céspedes con treboles o legumbres deseadas, hortalias, frutas o plantas ornamentales. No aplique más de dos tratamientos por año. Debe esperar por lo menos dos semanas entre aplicaciones. No lo aplique directamente, ni cerca de, agua, drenajes pluviales, cunetas, alcantarillas ni zanjas de drenaje. No lo aplique en una franja de 25 pies de ríos, estanques de peces, lagos, arroyos, embalses, pantanos, estuarios, bahías y océanos. Para evitar el escurrimiento del producto, no riegue en exceso la zona o

zonas tratadas hasta el punto de escurrimiento, ni lo aplique cuando llueva o el día que se espere lluvia. Enjuague el aplicador sobre el césped solamente. Nota: La aplicación al césped Bermuda puede causar amarillamiento o decoloración temporal, pero se puede esperar una recuperación total. No aplique al césped Bermuda cuando las temperaturas diurnas sean superiores a los 90°F. No aplique al césped zoysia recién saliendo de inactividad, ya que puede causar daño al césped.

DÓNDE USAR

Este producto está diseñado para uso de los propietarios en céspedes residenciales. Aplique este producto únicamente a las siguientes especies de céspedes: Césped de clima frío: pasto azul de Kentucky, ryegrass perenne, especies de festuca, incluyendo alta, roja y de hoja fina. Césped de clima cálido: zoysia**, Bermuda***, buffalograss.

**No aplique al césped zoysia recién saliendo de inactividad.

***La aplicación al césped Bermuda puede causar amarillamiento o decoloración temporal, pero se puede esperar una recuperación total. No aplique al césped Bermuda cuando las temperaturas diurnas sean superiores a los 90°F.

CUANDO USAR*

Aplique cuando las temperaturas diurnas se encuentren entre 45°F y 90°F.

PRIMAVERA: Para obtener mejores resultados, rocíe cuando las malezas de hoja ancha son jóvenes y están en crecimiento activo con la humedad de suelo adecuada.

OTOÑO: Para obtener mejores resultados, rocíe cuando las malezas de hoja ancha son jóvenes y están en crecimiento activo con la humedad de suelo adecuada. Las aplicaciones en otoño controlarán las malezas que, de otra manera, podrían pasar inactivas en invierno y volver a brotar en la primavera siguiente. Si hay muchas malezas herbosas, haga una segunda aplicación con la misma dosis, 14 días después de la primera aplicación.

MANO DE CANGRIJO (GRANDE Y CHUAVE): Primavera y principios del verano: Para obtener mejores resultados, aplique este producto desde la emergencia del pasto mano de cangrijo hasta la etapa de seis hojas (dos refollos) o antes de que el pasto mano de cangrijo tenga de 3 a 4 pulgadas de altura. Este periodo comienza la primera vez que usted observa mano de cangrijo en su césped. Haga dos aplicaciones con un intervalo de 14 días entre aplicaciones para poblaciones densas.

COLA DE ZORRO (VERDE GIGANTE Y AMARILLO): Primavera y principios del verano: Para obtener mejores resultados, aplique este producto a la cola de zorro durante las etapas de crecimiento inicial o cuando la planta tenga de 1 a 4 pulgadas de altura. Haga dos aplicaciones con la misma dosis con un intervalo de 14 días para poblaciones densas.

CYPERUS ESCULENTUS (JUNCIA AVELLANADA): Principios del verano: Se necesitan dos aplicaciones de este producto cuando las plantas de juncia avellanada tienen de 3 a 6 pulgadas de altura. Realice la segunda aplicación con la misma dosis 14 días después.

MALEZAS DE HOJA ANCHA: Primavera: Para obtener mejores resultados, aplique cuando el diente de león, harrín, ranúnculo, verónica, poligono y otras malezas de hoja ancha son jóvenes y están en crecimiento activo con la humedad de suelo adecuada. Otoño: Para obtener mejores resultados, aplique cuando la ortiga mansa, pangolina, trébol blanco, bledra terrestre, Soliva sessilis y otras malezas de hoja ancha son jóvenes y están en crecimiento activo con la humedad de suelo adecuada. Las aplicaciones en otoño controlarán las malezas que, de otra manera, podrían pasar inactivas en invierno y volver a brotar en la primavera siguiente.

*Las señales visuales y el tiempo que tarda la eliminación completa dependerá del tipo de maleza, la temperatura y la dosis de aplicación.

CÓMO USAR

1. Gire la boquilla a un tipo de rocío grueso. Evite los rocíos demasiado finos porque pueden causar arrastre y dañar otras plantas.
2. Rocíe las malezas no deseadas hasta cubrirlas por completo.

CONSEJOS SOBRE EL USO

* Puede ser necesario repetir el tratamiento en algunas malezas difíciles de eliminar. Espere por lo menos 30 días entre las aplicaciones; algunas malezas pueden demorar ese tiempo en morir.
