5. Remove and dispose of gloves. Then, wash hands thoroughly. 4. Close the station by firmly pushing the window down until latches click into place. The bait station is securely closed when all 4 clips have snapped back into place.

3. Wearing gloves, fill the station by placing up to 6 blocks on the steel rods inside the station. 2. With the thumb of one hand push down on the outer latch while simultaneously squeezing the other latches and pulling lid upwards with the other hand. 1. Locate the 4 latches on top of the station.

on will need both hands to open the station. nch as possible. If reinfestation does occur, repeat treatment.

15 days or until signs of rat or mouse activity cease in infested areas. While wearing gloves, replace bait in bait station when bait is consumed or confaminated. Wearing gloves, collect and dispose of all dead animals and leftover bait properly as specified on this label. To discourage reinfestation, limit sources of rodent food, water and harborage as unuch as opecified on this label. To discourage reinfestation, limit sources of rodent food, water and harborage as unuch as opecified on this label. in concealed areas, along a wall or in corners in areas inaccessible to pets where rats and/or mice or their signs have been seen. Place additional bait stations at 15 to 30 foot intervals. Maintain a constant supply of fresh bait for at least While wearing gloves, place 2 blocks of bait on each steel rod in the bait station. Station can hold up to 6 bait blocks. Replace each block as necessary. Place the bait station indoors at highest point of activity by gnawed openings, I. Remove the bait station from the carton 2. Placement: Place along walls or in corners out of reach of pets with the entrance holes exposed.

TO CONTROL NORWAY RATS, ROOF RATS, AND/OR HOUSE MICE: Determine areas where rats and/or house mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, or in other locations where there are signs of rats or house mice.

SELECTION OF TREATMENT AREAS: Use only to control Norway rats, roof rats and house mice in homes. This bait station may be used in indoor areas accessible to children, consistent with all use restrictions and other requirements indicated in this label.
 DO NOT USE THIS PRODUCT OUTDOORS OR IN AREAS ACCESSIBLE TO PETS.
 DO NOT place bait station in areas where there is a possibility of contaminating food or surfaces that come into direct contact with food.

Jee only for sites, pests, and application methods described on this label. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label before using this product. Follow all use directions and use precautions.
