

# Espoma Organic <sup>Brand</sup> *Slug & Snail Bait*

Net Weight 1.25 lbs. (0.56 kg)

**NEUDORFF**  
  
 Manufactured under a license of  
 W. Neudorff GmbH KG, Germany.  
 Distributed by Espoma Organic  
 6 Espoma Road, Millville, NJ 08332.

Use the bait to protect fruits from slugs and snails, but not limited to: apples, avocados, cherries, grapes, melons, peaches, plums, raspberries and pears. For seedlings spread the bait around the base of the stem. Apply at 0.15 oz. or 1 level teaspoon per square yard, in a 6 inch circular band around the base of the plants to be protected. For older plants, spread the bait around the base of the tree to intercept slugs and snails traveling to the trunk. Apply the bait at the rate of 0.5-1 lb. per 1000 square feet for granular bait.

## CITRUS

Use the list to protect any vegetables from slug damage, including (but not limited to): artichokes, beans, cabbage, black-eyed peas, asparagus, Brussels sprouts, beets, cantaloupe, radishes, cauliflower, corn, cucumbers, eggplants, garlic, green onions, peas, peppers, potatoes, radishes, rutabagas, spinach, Swiss chard, tomatoes and vegetables. Scatter the bait around the perimeter of the vegetable plot at the rate of 0.5-1 lb per 1000 square feet, or for smaller areas, 0.15-0.2 lb per 1 level trowel, per row. Scatter the bait in the garden plot (1 slug or snail is inside the rows, then scatter the bait on the soil around the base of the plants and between the rows).

**SALES**

**WHERE TO APPLY.** Treat all likely areas of infestation, especially around the perimeter of garden plots. Aphids use these pests' travel into plant areas from nearby refuges. They favor dark places around vegetable plants such as beans, tomatoes, lettuce, cabbage, celery and squash. Other favorite areas are flower gardens, rockeries, hedges, dandelion lawns, citrus groves, ivy patches, and other ground cover where they obtain shelter by day.

## Baits & Kills Slugs & Snails

### For Use Around Vegetables, Shrubs, Flowers & Lawns

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION** See side panel for first aid and additional precautionary statements

## PRECAUTIONARY STATEMENTS

### Hazards to Humans and Domestic Animals:

**CAUTION:** Causes moderate eye irritation. Avoid contact with eyes and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, and using the toilet.

**Environmental Hazards:** To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters.

Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

#### STORAGE AND DISPOSAL

Do not contaminate water, food,  
or feed by storage or disposal

**PESTICIDE STORAGE:** Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

**CONTAINER DISPOSAL:**  
Nonrefillable container.

**If empty:** Do not reuse or refill this container. Offer for recycling if available.

**If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

## FIRST AID

**If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**Hotline Number**  
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information concerning this product, call the National Pesticide Information Center at 1-800-858-7378 seven days a week, 6:30 am to 4:30 Pacific Time (NPIC Web site: [www.npic.orst.edu](http://www.npic.orst.edu))

### GENERAL INFORMATION (WHY SLUG AND SNAIL BAIT IS EFFECTIVE)

This product contains a unique combination of iron phosphate, which is a plant nutrient that occurs in soils, with slug and snail bait additives. The bait which is not ingested by snails and slugs will degrade and become a part of the soil.

The bait is ingested by slugs and snails when they travel from their hiding places to plants. Ingestion, even in small amounts, will cause them to cease feeding. This physiological effect of the bait gives immediate protection to the plants even though the slugs and snails may remain in the area. After eating the bait, the slugs and snails cease feeding, become less mobile and begin to die within three to six days. Dead slugs and snails may not be visible as they often crawl away to secluded places to die. Plant protection will be observed in the decrease in plant damage.

This product will control snails and slugs in or on home lawns, gardens, greenhouses, outdoor ornamentals, vegetable gardens, fruits, berries, citrus and crop plants. The bait can be scattered on the lawn or on the soil around any vegetable plants, flowers or fruit trees or bushes where snail or slug control is needed.
