DIRECTIONS FOR USE

GETTING STARTED: Pour the ready-to-use formula into your battery, pump, or non-heated sprayers. No mixing or measuring is needed. Always read and follow the directions on your specific battery, pump, or non-heated sprayers.

NOT intended for use with any propane or electric heated foggers.

HOW TO APPLY

TO KILL MOSQUITOES: Hold battery, pump, or non-heated sprayer upright and aim nozzle away from face and other people. Spray in a slow sweeping motion toward the area to be treated. For best results, spray when the air is calm and contact as many insects as possible. If a breeze is blowing, spray in the same direction as the wind. Repeat as necessary.

TO REPEL MOSQUITOES: To create a mosquito repellent zone, spray surfaces and vegetation in areas where mosquitoes congregate from approximately 2-5 feet away including: plant leaves and dense foliage, under and around decks, porches, patios, outdoor screens, tents and other surfaces pests may contact. Give special attention to any dark, humid areas, as mosquitoes prefer to rest in these areas. Allow a few minutes for the product to take effect. Reapplication will be needed after rainfall, or 12 hours.

RESTRICTIONS

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Do not allow people or pets to enter treated area until spray has dried.

USE PRECAUTIONS

Do not apply directly to new transplants, newly rooted cuttings or drought stressed plants. Do not make applications when temperatures exceed 85° F. Prior to full-scale application to plants, spray an inconspicuous area and wait 24 hours for to observe for potential damage. Also test blooms for sensitivity. When spraying hard surfaces, be careful to avoid excess residues which may be slippery.

Spray when air is calm (i.e. under 5 mph) and work backwards to avoid drift. If product freezes, return to room temperature and use according to directions.

CAUTION: Always use good safety practices when using this product, such as avoiding contact with eyes and skin and keeping out of reach of children and pets. If eye or skin contact occurs, flush thoroughly with water. For medical information, call 1-800-225-2883.

STORAGE AND DISPOSAL

Store in original container in a cool, dry area. Keep container tightly closed. When container is empty, place in trash or offer for recycling if available.

MODO DE EMPLEO

PARA COMENZAR: Vierta la fórmula lista para usar en su rociador de bomba, a pilas o no calefactado. Sin necesidad de mezclar o medir. Siempre lea y siga las instrucciones de su rociador de bomba, a pilas o no calefactado.

NO debe usarse con ningún rociador calefactado eléctrico ni a propano.

CÓMO APLICAR

PARA ELIMINAR MOSQUITOS: Sostenga el rociador de bomba, a pilas o no calefactado en una posición vertical, y apunte la boquilla lejos del rostro y otras personas. Rocíe en un movimiento de barrido lento hacia el área a tratar. Para obtener los mejores resultados, rocíe cuando no haga viento, haciendo contacto con tantos insectos como sea posible. Si sopla una brisa, rocíe en la misma dirección del viento. Repita cuantas veces sea necesario.

PARA REPELER MOSQUITOS: A fin de crear una zona repelente de mosquitos, rocíe las superficies y la vegetación de las áreas donde los mosquitos se congregan, a una distancia de aproximadamente 2 a 5 pies (60 a 150 cm), incluyendo: las hojas de las plantas y el follaje denso; debajo y alrededor de terrazas, pórticos, patios, mosquiteros exteriores, carpas o toldos; y otras superficies con las que las plagas pueden entrar en contacto. Preste especial atención a cualquier espacio oscuro y húmedo, ya que los mosquitos prefieren descansar en estas áreas. Espere unos minutos a que el producto surta efecto. Habrá que hacer otra aplicación después de llover o a las 12 horas.

RESTRICCIONES

No aplique este producto de forma que entre en contacto con otras personas o mascotas, ya sea directamente o al ser arrastrado por el viento. No permita que las personas o las mascotas ingresen al área tratada hasta que el rociado se haya secado.

PRECAUCIONES DE USO

No aplique el producto directamente a los trasplantes nuevos, los esquejes recién enraizados ni las plantas o céspedes estresados por la sequía. No realice aplicaciones cuando las temperaturas superen los 85 °F (29 °C). Antes de aplicarlo a gran escala en plantas, rocíe un área poco visible y espere 24 horas para observar los posibles daños. Pruebe también la sensibilidad de las flores. Al rociar superficies impermeables, tenga cuidado de no dejar un exceso de residuos, los cuales pueden ser resbaladizos.

Rocíe cuando el viento esté tranquilo (es decir, por debajo de los 8.5 km/h) y trabaje de atrás hacia adelante para evitar la dispersión del rocío. Si el producto se congela, permita que regrese a la temperatura ambiente y úselo según las instrucciones.

RESTRICTIONS

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Do not allow people or pets to enter treated area until spray has dried.
